OR

Describe the experiment conducted by Louis Pasteur to cure Anthrax.

XI. Read the following passage carefully and answer the questions given below :

1 x 4 = 4 (2 x 2)

The greatest defect of our civilization is that it does not know what to do with its knowledge. Science has given us powers fit for the Gods, yet we use them like small children. For example, we do not know how to manage our machines. Machines were made to be man's servants ; yet he has grown so dependent upon them that they are in a fair way to become his masters. Already most men spend most of their lives looking after and waiting upon machines. And the machines are very stern masters.

They must be fed with coal, and petrol to drink and oil to wash with, and they must be kept at the right temperature. And if they do not get their meals when they expect them, they grow sulky and refuse to work, or burst with rage and blow up, and spread ruin and

destruction all around them. So we have to wait upon them very attentively and do all that we can to keep them in good temper.

Already we find it difficult either to work or play without the machines

and a time may come when they will rule us all-together just as we

rule the animals.

Questions :

43. a) Why were the machines first made and what has happened now ?

b) How do machines react if they are not given food at the expected time ?

XII. Write an essay of about 18-20 sentences on any one of the

following topics :

1 × 5 = 5

44. a) Environmental pollution and protection

b) Dowry a social evil.

**XIII. Imagine you are Bhavidhar / Bhavya of Government High School,
Gulbarga.**

45. Write a letter to your friend telling him / her about the 75th
Independence Day celebration in your school. **1 × 5 = 5**

OR

**Imagine you are Chandrakanth / Chandralekha of
Government High School, Bengaluru.**

Write a letter to the Health Officer, BBMP complaining against
insanitary conditions of the colony you live in.
